4

Floodable Edges & Tidal Zones

Hamburg, Germany - Hafen City, Historic City Center

3

Raised Grade & Infrastructure

Hamburg, Germany - Hafen City

2

International Expo & Living Laboratory

IBA_HAMBURG

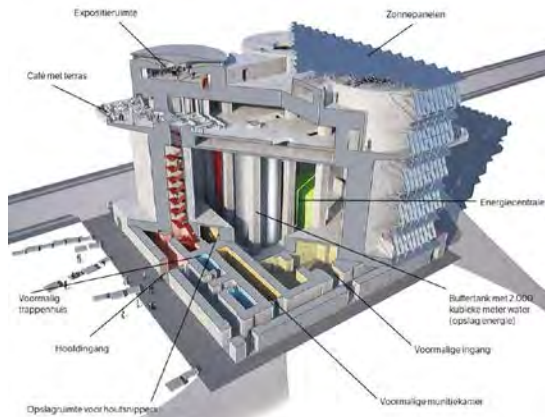

This booklet presents a selection of IBA building projects. IBA Hamburg is involved in around 200 projects, a large number of them are new built works, but there are several well-established and cultural projects, or projects that have single specific goals, such as the Education Zone for regional educational programmes, or the Harbour on Wilhelmsburg Central Protection Concept that incorporates many of IBA's measures along the Top Climate Plan and Hamburg Energy Partnership, which are required to make the Elbe reach a major of climate-neutral urban development.

KIT	Cosmopolis	Cities and Climate Change
	 Hesse of Projects	 New Port Battery Building at Spranzeninsel
